DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 8-21, drawn to methods for detecting organ tissue's condition by injecting it with an antibody specific to the marker substance and radiolabeled with a pharmacologically inert radioisotope or MRI, classified in class 604, subclass 20.
- II. Claims 46-47, drawn to an injectable composition produced by antibody and non-malignant or bone marrow cells, classified in class 424, subclass 182.1 or 183.1.
- III. Claim 59, drawn to a kit of a prefilled syringe, classified in class 604, subclass 424.
- IV. Claim 60-61, drawn to a method for cancer therapy, classified in class 424, subclass 1.49 or 9.6.
- V. Claims 62-65, drawn to method and apparatus for therapeutic conjugating, classified in class 435, subclass 320.1 or 253.3.
- VI. Claims 66-74, drawn to an immunological method of affecting a hormonal function of a cell, classified in class 604, subclass 500.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects, different functions and different modes of operations.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aamer S. Ahmed whose telephone number is 571-272-5965. The examiner can normally be reached on Monday thru Friday 9-5.
